

Subject: Book Enclosed - A Strategy to Avoid Another Endless War in Iran

Dear Mr. Vice President,

I have just sent you by Priority Mail a copy of my new book, "BB or Not BB," with a cover letter.

I am an Iranian-born American citizen and author of many books on Iran.

In the past six months alone, I have published two books documenting with Quranic references and ideological proof that Washington fundamentally misunderstands the nature of the Islamic Republic.

As each day passes, the world witnesses an unending conflict.

I have spent 20 years urging the White House to study their Constitution, which explains why this conflict serves the Ayatollahs' interests.

Their survival depends on war and confrontation.

We must look to the day after.

My proposal is simple and direct: Change the Battlefield from the Persian Gulf to the Constitution.

Instead of bombs and maximum pressure, let us support a democratic, legal process inside Iran — a Constituent Assembly to draft a new Parliamentary Constitution.

This is how we avoid another costly, endless war.

Given your clear stance against endless wars, I believe this strategy will resonate with you.

I have also sent this proposal to President Trump.

I would be honored if your national security staff would review the book, and I am available for any questions.

Respectfully,

Sohrab ChamanAra

Author of "BB or Not BB"
